

Revision Exercise

1) In this question, you'll work on an online CD order site as shown on the right. The page consists of the following:

- A picture of the CD cover (assume the file name is **cover.jpg**)
- A level-1 heading showing the CD name (e.g. *Best classic Songs*)
- A short paragraph describing the CD content (e.g. *The CD contains...*)
- A track-list table
- A purchase form with only a quantity box and an order button

In the space provided below, write down the HTML body of the CD details page. There's no need to consider the CSS styles. Also there's no need to write down the order form and the exact paragraph content. Simply write ... instead. [12 marks]

The screenshot shows a web page for ordering a CD titled "BEST CLASSIC SONGS". On the left is a CD cover image labeled "VIOLIN Solos, Duets, Trios". To the right of the image is a heading "BEST CLASSIC SONGS" in blue. Below the heading is a paragraph: "The CD contains fine classical songs played by top performers worldwide. The orchestra contains sections of string, brass, woodwind, and percussion instruments together with harp and electronic instruments. Besides the classical guitar, heckelphone, flugelhorn, cornet, harpsichord, and organ, saxophones also participates." Below the paragraph is a table with three columns: "Track", "Title", and "Time". The table contains two rows of tracks and a total row. At the bottom left is a "Quantity:" label with a dropdown menu showing "1", "2", and "3", and an "order" button.

Track	Title	Time
1	Symphony no. 5	18:30
2	Piano Concerto no. 4	10:04
Total		28:34

Quantity:

```
 (1: img, 1: src)
<h1>Best Classic songs</h1> (1: h1)
<p>...</p> (1: p)

<table border=1> (1: table)
(1: thead, 1:tr, 1:th)
<thead><tr><th>Track</th><th>Title</th><th>Time</th></tr></thead>

(1:tfoot, 1: colspan) (-1 if tfoot not before tbody)
<tfoot><tr><th colspan=2>Total</th><td>28:34</td></tr></tfoot>

(1:tbody, 1:td)
<tbody>
  <tr><td>1</td><td>Symphony no. 5</td><td>18:30</td></tr>
  <tr><td>2</td><td>Piano Concerto no. 4</td><td>10:04</td></tr>
</tbody>
</table>
```

5). Without defining any id and class, write down the Embedded CSS block which format all level-1 headings (i.e. **<h1>**) as follows: [16 marks]

- Each heading is enclosed by a box with black border of 2 pixels thick
- Small spaces (of 7 pixel wide) are preserved between the border and the internal text
- Text is rendered as blue font on yellow background
- All characters are converted to capital letter and rendered in italic style

(Before CSS applied)
This is Level-1

(After CSS applied)
THIS IS LEVEL-1

```
<html><head>
write your solution here

<style type="text/css"> (2)
  h1 { (2)
    text-transform: uppercase; (2)
    color: blue; (2)
    background-color: yellow; (2)
    border: solid 3px black; (2)
    padding: 7px; (2)
    font-style: italic; (2)
  }
</style>

</head><body>...</body></html>
```

6) Suggest the output of the following JavaScript code: [10 marks]

Source Code	Output
function ADD(a,b) { return parseInt(a)+b; } a = 3.14; b = 5; c = "123"; alert(ADD(a,b)); alert(ADD(b,c)); alert(ADD(c,a)); alert(12%b); alert(ADD(a,ADD(b,c)));	8 5123 126.14 2 35123

7) The drop-down list (**Quantity**) in the order form of question 1 (containing options from 1~20) is actually generated by JavaScript. Write down the JavaScript for the list [5 marks]

```
document.write("<select name=Quantity>");  
for (i=1;i<=20;i++) document.write("<option>"+i+"</option>");  
document.write("</select>");
```

1 mark each: document.write, select, option

Correct for-loop: 2 marks
